QSP Solutions specialise in the provision of management systems consultancy services including quality, environmental, health and safety and information security management.

All our services are delivered by professionally qualified and experienced employees. All work is in accordance with written procedures, with lines of responsibility and accountability defined and checks incorporated. To achieve this, we are committed to a continual improvement culture throughout the organisation based on stated company objectives and the EN ISO 14001 standard.

The principles embraced in the ISO 14001 standard have been embodied in our formal Management System.

The management and all who work at QSP Solutions are committed to the care of the environment and the prevention of pollution. QSP Solutions seeks to minimise waste arising, promote recycling, reduce energy consumption and emissions and, where possible, to work with suppliers, contractors and those working on behalf of the organisation who have sound environmental policies.

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. These objectives and targets are publicised throughout QSP Solutions and all staff are committed to their achievement.

As such this policy:

- Requires the setting and reviewing of Objectives, which derive from an analysis of the needs of interested parties, internal and external factors, mitigating actions and the performance of key processes.
- Includes a commitment to satisfy applicable requirements (customers, legislative, statutory).
- Commits QSP Solutions to continually improve the Management System.
